PROFESSIONAL SUMMARY

Data Analyst with a background in Economics and over 3 years of experience turning operational, financial, and customer datasets into actionable business insights. Skilled in Advanced Excel (Pivot Tables, Power Query, XLOOKUP/VLOOKUP, data modelling), Power BI (DAX, dashboard design), Python for data manipulation and analysis, SQL for relational querying, and SPSS for statistical analysis. Experienced collecting, cleaning, and integrating data across cross-functional, remote teams, and translating technical findings into clear, actionable insights for non-technical stakeholders. Comfortable working independently in fast-moving environments.

CORE SKILLS

- Advanced Excel: Pivot Tables, Power Query, XLOOKUP/VLOOKUP, data modelling, financial forecasting
- Power BI: DAX, advanced visuals, interactive dashboard design and automation
- Python: Pandas, NumPy, Matplotlib for data cleaning, transformation, and exploratory analysis
- SQL: complex querying, joins, CTEs, and window functions; SPSS for statistical analysis and data management
- CRM & Commercial Data: auditing, cleaning, and enriching datasets; sales funnel and customer retention analysis
- Analytics: exploratory data analysis, cohort analysis, anomaly detection, statistical summaries
- Delivery & Collaboration: Agile/Scrum, Git/GitHub, Airtable, Slack, Microsoft Teams; Tableau, Salesforce Dashboarding

PROFESSIONAL EXPERIENCE

Financial Analyst Intern | *Chicago, US (Remote)*

January 2026 – Present

- Collect and analyze operational and financial datasets across international, cross-functional teams to surface trends and process inefficiencies.
- Manage global reporting pipelines and ad-hoc data requests, maintaining clean, structured, and auditable datasets for forecasting.
- Build and present analytical frameworks and reports for financial forecasting and budgeting in cross-team alignment sessions with Product and Operations stakeholders.

Data Analyst | *Arizona, US (Remote)*

January 2022 – January 2025

- Collected, cleaned, and transformed unstructured operational data into optimized, repeatable datasets using SQL and Excel, including Pivot Tables and data modelling.
- Performed exploratory data analysis to investigate pipeline anomalies, producing clear documentation and insights for engineering teams.
- Designed interactive Power BI dashboards (DAX, advanced visuals) that translated complex backend data into clear, actionable visuals for non-technical stakeholders.

Freelance Business Analyst (Concurrent Part-Time) |

August 2022 – August 2024

- Ran end-to-end analytics engagements, cleaning and analyzing client datasets to turn ambiguous requirements into structured insights.

- Built and documented Power BI dashboards and reports enabling e-commerce clients to independently monitor operational and commercial metrics.
- Analyzed customer retention data using Excel, Python, and SPSS to generate insights supporting revenue decisions for small business clients.

SELECTED PROJECTS

Banking Data Analysis & Liquid Asset Dashboard — Power BI, SQL, Advanced Excel

- Built an end-to-end transaction tracking dashboard with KPI visuals and card matrices, cutting manual liquidity reporting time by an estimated 30% for senior leadership.

E-Commerce Revenue Operations Tracker — Python/Pandas, Advanced Excel, Power BI

- Built a Python-based analytical engine to clean customer data and automate cohort retention analysis, reducing manual analysis time by an estimated 40% for repeatable, cross-department use.

Customer Churn Analysis Dashboard — Power BI, DAX, Data Modelling

- Built a self-directed Power BI dashboard (DAX, KPI cards, slicers) analyzing churn across 7,000+ customers, identifying month-to-month contracts and electronic check payments as the leading churn drivers to support retention strategy.

Economic Research Study — SPSS, Statistical Analysis

- Used SPSS to run descriptive statistics and regression analysis on socioeconomic survey data for an undergraduate economics research study, presenting findings and statistical significance in a structured report.

EDUCATION & CREDENTIALS

- B.Sc. in Economics — University of Uyo, Akwa Ibom, Nigeria (2024)
- Microsoft Certified: Azure AI Fundamentals (AI-900) (2025)
- Data Science Professional Program — statistical methods, predictive tools, algorithm logic (2025)
- National Youth Service Corps (NYSC) — Discharge Certificate (2026)
